Projects

Market Avenue - Full Stack Developer

<https://github.com/Lambda-School-Labs/quick-street-be>

React | Nodejs | Express | Knex | Sass

- ❑ Rebuilt the backend and created relational databases using Postgres and Knex.
- ❑ Built a Restful web API and implemented server-side authentication using JSON web tokens and Express middleware.
- ❑ Restructured and improved the Frontend to work with a new backend and match designer's mockups.
- ❑ Collaborated on a remote cross functional team with 1 UI/UX designer and 3 Full Stack engineers.

AirBnB Price Optimizer - Frontend Developer

<https://airbnb-price-optimizer.now.sh/>

React | Sass | React Hooks | Context API

- ❑ Designed and built out frontend to digest backend data and testing endpoints with Postman.
- ❑ Created mockup using Figma to design and structure the app's UI/UX.
- ❑ Coordinated with a team of 3 Data scientists, 1 Product Manager, and 2 Full Stack engineers to create an app that predicts the best price for a user's listing using city data.

KSL For Rent - Primary QA Engineer

<https://homes.ksl.com/rent/search>

- ❑ Identified and triaged areas for testing across multiple browsers and devices to ensure app was ready for launch.
- ❑ Directed testing efforts on release with multiple other QA's to catch bugs and improve UX.
- ❑ Created bug defect reports and worked with the dev team to identify, test, and implement fixes based on user feedback.

Skills

Frontend: HTML5, CSS3, JavaScript, Python, React, Svelte, LESS, SASS, Redux, Context API, Figma

Backend: Postgres, Knex, Express.js, Node.js, GraphQL

Testing: React-Testing-Library, Cypress.io, Manual testing

Miscellaneous: Certified Scrum Master(2019)

Education

Lambda School

Sept. 2019 - Present

Part-Time Full Stack Development Cohort - Computer Science and Engineering Academy

Brigham Young University

Graduated Dec. 2017

Bachelor of Arts - Political Science; Minor - International Strategy and Diplomacy

Experience

SoftServe - Senior QA Engineer

July 2018 – Present

- ❑ Identify issues and work with development team to ensure improvements are implemented in software products and features.
- ❑ Direct international QA team to ensure certain software releases meet quality standards.
- ❑ Create descriptive test cases to assist in automated and manual software testing.
- ❑ Write automated tests in Cypress.io to test web applications.
